### ***Morphy Richards Soup Maker***

The ***Morphy Richard's Soup Maker*** has become the work-at-home go-to gadget. You won't remember how you coped before you got it. Well, you probably will remember making a mess of the kitchen and getting soup all over yourself trying to blend the ingredients with a stick blender in a small saucepan.

So, why not try a **soup maker**? You'll be surprised you'd never thought of it before! It even has multiple settings for different types of soups – smooth, chunky and a drinks setting for your favourite smoothies.

It's compact, easy to clean and easy to use. You just need a bag of ready chopped vegetables from the supermarket, or alternatively, chop your own, add some stock and that's it! You just bung everything in together, pop the lid on, plug it in and twenty minutes later you have a delicious soup for lunch.

There's no need to faff about with messy stick blenders anymore. You can even freeze any leftover soup for later. A trusted brand at £37.99 for a 2-litre jug - what are you waiting for?
