Since Costa Rica is a new migrant destination country, particularly from the UK and Europe, it isn't as easy to migrate to as some people think -- the red tape is notoriously complicated.

For example, the government of Costa Rica requires that prospective migrants have an employment contract in Costa Rica *before* they even pay for international removals.

On top of this, all health care insurance needs to be completed before arrival, and don't forget that your removals will have to sit at customs for at least a couple of months before being delivered to your new abode.

However, this shouldn't stop you!
